

SMART™

CoolGreen+

Cooling Sensate with
Enhanced Stability

BENEFITS

CoolGreen+ is a clear liquid sensate that provides a refreshing cool sensation when applied to the skin. The cooling agent is solubilized in natural pentylene glycol, which can easily be incorporated into formulations without crystallization, temperature, or allergenic concerns. The cooling effect can range from a subtle refreshment to a powerful tingling sensation based on usage level. This cooling complex can be utilized in a variety of applications such as skincare, facial care, color cosmetics, oral care, and OTC products.

INCI Name: Pentylene Glycol (and) Methyl Diisopropyl Propionamide

Usage Level: 0.1 - 2.5%

KEY ATTRIBUTES

- Cooling
