

EXOGLO™ BALANCE

CELLULAR SENESCENCE DEFENSE TECHNOLOGY

ExoGlo™ Balance is a next-generation bioactive complex that unites seven heritage roots and botanicals with a plant-based exosome derived from *Centella Asiatica*. It is designed to counteract cellular senescence, restore skin homeostasis, and revitalize dermal vitality. **ExoGlo™ Balance** restores equilibrium within the skin's ecosystem — reviving vitality, improving tone and texture, and extending the lifespan of healthy, youthful skin cells.

THE SCIENCE OF EXOGLO™ BALANCE

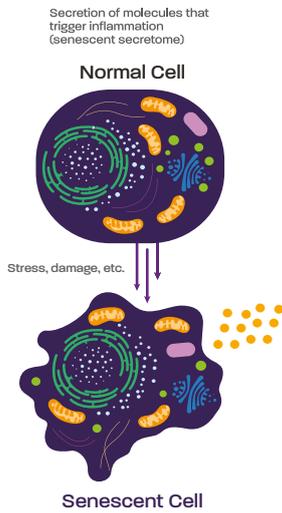

ExoGlo™ Balance employs *Centella Asiatica*-derived nanovesicles to rejuvenate cell signaling pathways, enhance bioavailability, and counteract senescence-driven cellular fatigue.

These tiny vesicles:

- Enhance penetration and bioavailability of phytonutrients
- Support cell-to-cell communication for synchronized renewal
- Modulate inflammation and oxidative stress at the molecular level
- Stimulate collagen synthesis and extracellular matrix repair

THE BOTANICAL MATRIX

- **Centella Asiatica (Exosomal Delivery System)**
Rich in asiaticoside and madecassoside, *Centella* exosomes act as a bio-signal network, promoting fibroblast renewal, barrier repair, and enhanced absorption of all co-actives.
- **Foxglove + Lily**
A hydration powerhouse duo that restores moisture to dry, depleted skin. Polysaccharides and flavonoids fortify the lipid barrier while combating oxidative and inflammatory triggers of senescence.
- **Ginger + Peony**
Invigorate microcirculation and mitochondrial activity for renewed energy at the cellular level. Gingerols and paeoniflorin reduce inflammation, soften fine lines, and enhance elasticity.
- **Lotus**
A gentle antioxidant and skin refiner rich in phenolic compounds that neutralize reactive oxygen species (ROS), supporting detoxification and visible radiance.
- **Solomon's Seal**
Deeply nourishing and barrier-protective, rich in saponins that reinforce the microbiome and minimize transepidermal water loss, promoting optimal hydration and resilience.

DUAL-ACTION SENESCENCE DEFENSE

ExoGlo™ Balance delivers a two-tier mechanism of action that targets the fundamental drivers of aging:

1. Prevention:

Delays the onset of cellular senescence by protecting mitochondrial integrity and genomic stability.

2. Containment:

Reduces the spread of senescence-associated signaling between cells—interrupting the inflammatory “cascade” that accelerates visible aging.

METHOD

- Add Phase A ingredients one by one while mixing.
- Add Phase B ingredients and mix.
- Premix Phase C in a separate vessel and pour slowly into Phase A while mixing.
- Take QC Specs.

SPECIFICATIONS

- Appearance: Thin liquid
- Color: Light Yellow to Yellow
- Odor: Characteristic
- pH: 4.0 - 5.0

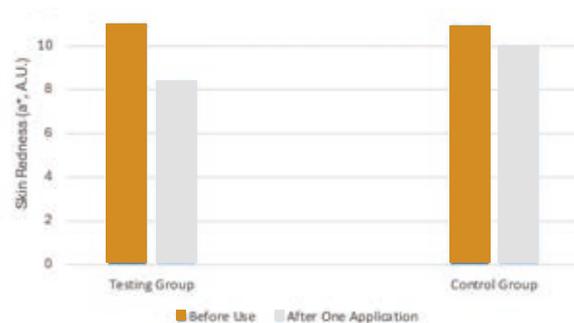

BALANCE SOOTHING FACIAL SPRAY

Ingredient	%
PHASE A1	
DI Water	71.70%
Glycerin	8.00%
Propylene Glycol	6.00%
Butylene Glycol	7.00%
Disodium EDTA	0.20%
ExoGlo™ Balance (Water, Butylene Glycol, Centella Asiatica Leaf Vesicles, Xanthan Gum, Paeonia Albiflora Root Extract, Nelumbo Nucifera Flower Extract, Polygonatum Officinale Rhizome/Root Extract, Liliium Candidum Root Extract, Rehmannia Glutinososa Root Extract, Panax Ginseng Root Extract)	3.00%
HyoGlo™ HA (Water, Glycerin, Sodium Hyaluronate, Hydrolyzed Glycosaminoglycans, Hydrolyzed c.tee, gess, damarStt CellnSenesceNormal Cell Hyaluronic Acid, Hyaluronic Acid, Tremella Fuciformis Polysaccharide, Polyglutamic Acid)	2.50%
PHASE B	
Phenoxyethanol (and) Ethylhexylglycerin	1.00%
PHASE C	
Fragrance	0.10%
Polysorbate 20	0.50%

SKIN SOOTHING EFFECT STUDY

In-Vivo Test

- 20 Women
- 30 - 50 Year(s) Old
- Skin Essence with 3% ExoGlo™ Balance

24% reduction in skin redness and inflammation after one application using ExoGlo™ Balance at 3%.

The Balance Soothing Facial Spray supports skin resilience & surface cell turnover, proactively delaying visible signs of aging for stronger, smoother skin.

While it has a more long-term approach, it also works to boost skin in a week into use.
