

SMART[™]

Gluconolactone USP

Chemical Exfoliator for
Sensitive Skin

BENEFITS

SMART Gluconolactone USP is a water soluble polyhydroxy acid (PHA) that provides chemical exfoliation for sensitive skin. Unlike alpha hydroxy acids (AHAs), SMART Gluconolactone USP has a large chemical structure, resulting in a gentle exfoliation experience that is safe for daily use. This ingredient effortlessly removes dead skin cells and results in a smoother and brighter complexion. SMART Gluconolactone USP also functions as a humectant, which imparts moisturization to your skin simultaneously while exfoliating.

INCI Name: Gluconolactone
Usage Level: 0.5 - 5%

KEY ATTRIBUTES

- Chemical Exfoliant
