

SMART™

# SMA'RT TEC

Excellent solubilizer and  
malodor inhibitor

## BENEFITS

SMA'RT TEC is a colorless, odorless and lipophilic ingredient made from the synthesis of ethyl alcohol and citric acid, which are derived naturally from sugarcane and corn. It is a pure solvent, diluent, and fixative for long-lasting perfumes. It is an excellent active agent for deodorant formulations because it inhibits the esterase-based metabolism of sweat components, which causes malodor. It is the preferred film-strengthening agent in high-grade hair sprays and nail polish. SMA'RT TEC is a dry emollient that provides a variety of benefits such as improved skin barrier function, increased moisturization, reduced soaping effect, and improved slip and glide. In formulations, it also functions as a solubilizer and pigment dispersing agent, which can be used to disperse insoluble organic UV filters.

INCI Name: Triethyl Citrate

Use Level: 2-5%

## BENEFITS

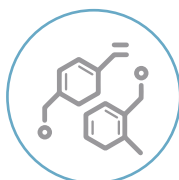

- |                          |                            |
|--------------------------|----------------------------|
| - Colorless & Odorless   | - Inhibit Malodor          |
| - Naturally Derived      | - Pigment Dispersing Agent |
| - Improve Skin Barrier   | - Solubilizer              |
| - Reduced Soaping Effect | - Emollient                |

## APPLICATIONS

- Deodorants
- Sunscreens
- Color Cosmetics
- Perfumes
- Skin Care
- Hair Care
- Nail Polish

Naturally  
Derived

Pigment  
Dispersant

Moisturizing

Odorless
